THE NATIONAL GUARD

The Week Devoted to the Semi-Annual Inspections.

SCRUTINY OF RECORDS AND EQUIPMENT

Officers Petition Headquarters Concerning Use of Armory.

MOVE TO INCREASE INTEREST

The entire attention of headquarters officials, of the heads of the several staff departments, of officers and of enlisted men eas been devoted this week to the first of the semi-annual inspections. During the afternoons the adjutant general and his assistants have been scrutinizing books and papers, the chief of ordnance and those detailed to assist him have been examining rifles, and the other officials have also been hard at work on other lines

Maj. Ourand, the inspector general, aided by two other officers of the general staff; has been inspecting the several commands n the evenings. Some of these inspections have been with the men in full dress uniform and some in fatigue uniform. Among the organizations to be inspected this even ing in the drill hall of the Center Market Armory will be the engineer corps, the ambulance corps and Light Battery A. The inspections will be in order during a portion of next week, as follows: General staff and the 1st Battallon, Monday; field and staff, 1st Regiment; field and staff, 3d Battalion, 2d Battalion and corps of field music. Tuesday.

The Naval Battalion will be visited by the inspecting officers at 11 o'clock tomorrow morning on board the U.S. S. Fern, Armory will be the engineer corps, the am-

Officers File a Petition. A petition signed by fifty-four officers has

een forwarded to militia headquarters. It is in reference to the use of the armory, and other matters. The officers who signed the paper set forth that, believing changes are necessary in order to increase interest in the organizations in general, respectfully submit the petition in the hope that what they consider are demands necessary for the betterment of the militia may be met. It is asked "that the armory be opened every week day from 1 to 11:30 o'clock p.m.; holidays from 9 o'clock am. to 11:30 o'clock p.m., and Sundays from 1 o'clock to 11 o'clock p.m. Line officers should be given consideration before armory rules are made, as they are in touch with the men and know best what they want. The armory should be open as much as possible, and made a place of welcome and also of interest, thus attracting new men into the Guard. are necessary in order to increase interest

est, thus attracting new men into the Guard.

"That the use of the school blackboard be discontinued, and that an officer's monthly drill report be deemed sufficient.

"That ammunition for use in the rifle gallery and on the range he furnished to guardsmen free of charge for practice prior to firing the required secres; that transportation to and from the range for practice be provided so far as may be possible, and further, that every possible concession be made to organizations of the District of Columbia National Guard, in order that officers nay have no excuse for not maintaining good commands."

The Signers. The petition is signed by Col. Henry May, 1st Regiment; Col. M. E. Urell, 2d Regient; Maj. J. W. Anderson, 2d Battalion; Maj. J. B. K. Lee, 1st Battalion; Maj. An ton Stephan, 4th Battalion; Maj. W. E. Harvey, 6th Battalion; Capt. E. C. Edton Stephan, 4th Battalion; Maj. W. E. Harvey, 6th Battalion; Capt. E. C. Edwards, Company A, 2d Battalion; Capt. D. V. On their own applications Private Augustus De Grummond, Battery A, Light On their own applications Private Augustus De Grummond, Battery A, Light Artillery; Private Samuel M. Marks, Company D, 1st Battalion; Private Karl R. Truesdell, Company B, 4th Battalion, have been honorably discharged.

Private George Dexter Kehoe, Ambulance Corps, has been transferred to 4th Battalion, as hospital steward.

The following-named enlisted men have been dishonorably discharged by reason of expulsion from company: Private St. C. Ambrose, Private Walter R. Berry and Private Harry R. McCabe, Company B, 1st Battalion.

The first competition open to members of the recently organized revolver club occurred a few days ago. The distance was twenty yards, ten shots with any revolver; osition standing; body free and arm erect. The scores were: Lieut. F. W. Holt, 42; Sergt. A. Whitacre, 39; Lieut. T. B. Amiss, 38; B. F. Edwards, 38; Lieut. W. M. Far-row, 37; Lieut. W. W. Cookson, 35; Lieut. G. G. Dennison, 35, and Sergt. G. F. Phil-

A meeting of the club for practice and competition will be held this evening. Rifle Team for Paris. Lieut. W. Milton Farrow, inspector of rifle practice of the 4th Battalion, is the

wthor of the following:
"A few marksmen in this city are anxio is to know if any real steps have been taken looking to the formation of a rifle team to

visit the Paris tournament this coming season. It is the writer's opinion it will repay any officer or genuine American gentleman with means to crganize a team of expert shots and attend the shooting matches to be held in connection with the exhibition; the cash prizes are to be numerous and valuable. Having had experience in seven international team matches, in all of which the victory was with the American team, I speak with the confidence of experience when I say it is time to take hold of this matter at once, if we can find life enough in shooting circles in this great country to organize and back up a team of expert shooters to win honors at the exposition matches. Many marksmen of the District join with the writer in asking that this subject be faken up."

Military Rifle Shooting Under the caption of "Encourage Military Rifle Shooting," a timely and interesting article has been published in Shooting and

Fishing, which is, in part, as follows: "It has often been said that Americans are a nation of riflemen, and we like to

Modern Military Arms.

"The time has come when military rifle shooting should be changed. This branch of shooting should now be done with modern military rifles that shoot the modern government cartridge. The use of such rifle and ammunition should not be restricted to the militia. The civilian should be encour-aged to shoot with such arms and ammuni-

the militia. The civilian should be encouraged to shoot with such arms and ammunition.

"There could be much accomplished if most of the matches now shot with the Springfield rifle and black powder cartridges were shot with modern small-bore military rifles and the government cartridge. Aside from the Krag-Jorgensen rifle, any strictly military rifle, such as the Winchester, Remington-Lee and Remington, shooting the United States government cartridge, should be permitted. This is specially urged in all prize meetings of an interstate character. All military matenes, outside of state matches, should be opened to all comers, whether nembers of military organizations or not. Every civilian rifle club should encourage shooting with such arms and ammunition, making such shooting a part of its orogram. Every rifleman should practice to some extent with such arms and ammunition.

What Would Follow.

What Would Follow.

"Should the foregoing suggestions be car ried out it is safe to say this would follow "Knowledge would be gained of the capa pilities of our modern national arm, about which we now know very little. "Skill would be acquired with a weapon

"Skill would be acquired with a weapon with which the militiaman now is unfamiliar, but which he would use if called into active service.
"The civilian would become familiar with a practical military arm.
"Our national strength would be greatly increased and upon a practical basts.
"It would make apparent merits or defects in our military arms and ammunition.
"It would demonstrate the comparative merits of the different makes of arms for the same cartridge."

MONTGOMERY COUNTY GRANGE. Meeting Held at Olney - General and

Personal News.
Special Correspondence of The Evening Star. ROCKVILLE, Md., January 23, 1900. Montgomery county grange was held yes terday in Grange Hall at Olney. The at endance was large and the proceedings interesting. Among those from a distance who participated in the discussions were J. B. Yager, master of State Grange: J. D. Cassard of Muirkirk, Prof. Taliaferro of the Maryland Agricultural College, The

Cassard of Muirkirk, Prof. Taliaferro of the Maryland Agricultural College. The meeting indorsed the bills now pending in the legislature which provide for state analysis of cattle feed and inspection of cereal seeds, as well as the bill providing for an increase in the jurisdiction of magistrates in this county.

A fifteen-year-old colored boy named Burgess was instantly killed Wednesday afternoon near Four Corners, this county. He was felling pine trees and was struck in the head by one of them. A jury of inquest was summoned and a verdict was rendered in accordance with the facts.

William Edward, the infant son of Mr. and Mrs. William E. Morgan of this place, died here today of membranous croup, after an illness of two days.

An evening of "Readings" was held in the Rockville Methodist Church Tuesday evening. It was given under the auspices of the literary department of the Epworth League. Rev. E. A. Edwards read a number of selections from well-known authors. The readings were interspersed with music by a quartet, composed of Mrs. O. M. Linthleum, Mrs. Benjamin Hicks, Dr. R. C. Warfield and Mr. Charles W. Prettyman. Rev. William S. German of Gaithersburg rendered several selections on the organ.

Mrs. W. F. Rabbitt and little child of this rendered several selections on the organ.

Mrs. W. F. Rabbitt and little child of this
place have gone to Martinsburg, W. Va., to
visit Mrs. Rabbitt's parents.

ALUMNI DINNER.

Brown University Graduates at Their Annual Function.

A dinner was given last evening at the Ebbitt House by the alumni of Brown University resident in the District and Maryland. The guests of the evening were Dr Faunce, the president of the university, and Dr. Kellen of Boston. The assistant surgeon general of the

United States army. Dr. Alden, made the address of welcome, to which Dr. Faunce replied. Dr. Kellen responded to the toast "Alumni." Covers were laid for seventy

president of Columbian University; Dr. W president of Columbian University; Dr. W. H. Hoggs, A. M. Quigg, J. M. Cutts, M. W. Lyon, Jr., W. A. Slade, W. E. Green and John H. Olcott.

The following are the officers of the club, which was organized a year ago: President, John Hay, Secretary of State; vice president, Charles H. Lingham of Baltimore; treasurer, John H. Olcott; executive committee, Dr. Sternberg, surgeon general, U. S. A.; A. M. Quigg and Prof. Wilber of Columbian University.

Address by Dr. Luccock.

The men's meeting at the Young Men's Christian Association, tomorrow afternoon at 4 o'clock, will be addressed by Rev. George N. Luccock, D. D., pastor of Met ropolitan Presbyterian Church. The men's Sible class, which meets at 3 o'clock, i taught by Dr. Merrill E. Gates, formerly president of Amherst College.

James B. Hartley, employed as a brake man on the Baltimore and Ohio railroad had the forefinger of his right hand caugh between two cars last night at the Anacos tia freight yard, nearly wrenching finger from its socket. The injury dressed by a physician in Anacostia.

Those Worrying Piles! One application of Dr. Agnew's O: ment will give you comfort. Applied every night for three to six nights and a cure is effected in the most to six nights and a cure is effected in the most stubborn cases of Bind, Bleeding or itching Piles. Dr. Agnew's Ointment cures Ecsema and all itch-ing and burning skin diseases. It acts like megic. 35 cents. Sold by F. S. WILLIAMS, 9th and F. sts.; EDMONDS & WILLIAMS, 3d and Pa. are. 18

THE PARIS

Provision to Be Made for Athletic Sports and Games.

BICYCLE AND AUTOMOBILE RACES

England's Colonies Expect to Make Elaborate Displays.

THEIR FINE BUILDINGS

Special Correspondence of The Evening Star

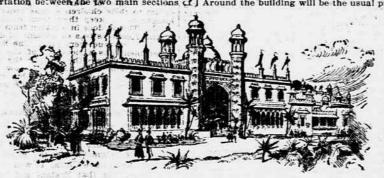

PARIS, January 18, 1900. It will be a matter of surprise to many visitors on reaching Paris to learn that one section of the exposition is located at Vincennes, outside the city limits, almost an our's ride from the heart of the city. In fact, this part of the fair covers several banks of the Seine. All the heavy transortation exhibits will be out here, and a nost of international sporting contests will be held in the spherous and beautiful Vinennes Park.

Multitudinous are the methods of trans-

will continue the fete of flowers on Lake Daumesnil. Another great event arranged for 1900

will be the "Olympic games," which will

be given in a colossal building, called the Stade Parisiene, close by the Arc de Triomphe. Some years ago a wealthy Greek citizen conceived the patriotic idea of restoring the famous stadium at Athens. Greece, which was erected by Herod At ticus and subsequently partly destroyed. Here in 1896 Olympic games were celeorated with great pomp in the presence of the King of Greece and notables from every country. Athletes from all parts of every country. Athletes from all parts of the world participated in the fetes, and these were the inspiration, so far as old Europe is concerned, of the great interna-tional movement for physical regeneration by athletic sports and gymnastic contests. The Parisians were deeply interested in this project, and such impetus has been given to physical sports of all kinds in Paris that the government does not besibhis project, and such impetus has been given to physical sports of all kinds in Paris that the government does not hesitate to give them very liberal financial support. From this public sentiment has sprung the Parisian Stadium, which is really an international academy of sport under the championship of M. Loris. During the exposition physical exercises and international athletic contests will take piace in the new building, which is modeled on the lines of the ancient stadium at Athens. Besides these contests there will be spectacular shows, such as used to take place in the old Parisian hippodrome. Champions of all kinds have been engaged to give demonstrations of the feats of Champions of all kinds have been engaged to give demonstrations of the feats of strength and skill through which they acquired renown. Performances will be given twice each day in an arena measuring about 20,000 square feet. The seating capacity of the auditorium is about 10,000. Around the building will be the usual prom-

BRITISH COLONIAL BUILDING, INDIA.

the fair. Boats, trams, trains, omnibuses and automobiles all stand ready to cover the distance for a consideration. The new Metropolitan railway will likewise help to annihilate time and distance.

The program of international sports and centests covers a wide field. It is divided sentially into ten sections. These are: First-Athletic games, such as foot ball, cricket, base ball, tennis, golf, running and

walking matches, jumping, etc. Second-Gymnastics. Third-Fencing with sword, foil and sa-Fourth-Shooting matches. Fifth-Horse racing-running, pacing and

trotting.
Sixth—Bicycling.
Seventh—Automobilism.
Eighth—Nautical events—yachting, boat-

ng, etc. Ninth-Life saving on land and water. Tenth—Aerostation—navigating the air,
The installations for gymnastics, shooting and fencing have been easily arranged,
while the pretty lake, Daumesnil, almost in
the center of the grounds, affords ample
water facilities for the nautical events and enades, restaurants, cafes and other con-

Archery Revived.

the various sports, archery-the oldest of them all, and probably the least known today-will be revived during the summer at Vincennes. It will be a picturesque sight even if there is no practical value in the bow and arrow in these fight. ing days of rapid-firing guns. Belgium and Great Britain boast a considerable number of amateurs in archery. It is expected that the "Royal Academy in Scotland," which received a charter from Queen Anne in 1703, will send over representatives, many of whom are remarkably adroit with the of whom are remarkably adroit with the ancient weapons at distances varying from fifty to one hundred yards. England has a royal Toxophilite Society and France a "Societe des Chevaliers de l'Arc," both founded in the eighteenth century and preserving at the present day the traditions of yore. In matches these societies place their targets at distances varying from one hundred to two hundred yards, and the members shoot in squadrons of six. The sight is usually very entertaining to spectators.

Great Golf Contests.

Great Golf Contests. water facilities for the nautical events and life-saving performances. This leaves automobilism alone to be provided for, and Paris is going to do everything in her power to give emphasis to the advantages of the latest forms of transportation. Thousands upon thousands of square feet of space have been allotted to the automobile exhibits, which will be the most comprehensive display of the kind ever attempted. France leads all other countries in the automobile industry, which continues to increase at rapid strides. The Automobile Club of France, comprising about 2,000 members, in which Count de Dion is The devotees of golf will be deeply interested in the amateur golf competition which will be held on the links of the French society for the promotion of this sport the last week in April. These links are located in Compiegne, one of the oldest cities of France, dating back more than eleven centuries. Here Joan of Arc was taken prisoner in 1430 and many other important historical events, including the marriage of Napoleon I and Marie Louise, were celebrated in this encounter.

BRITISH COLONIAL PAVILION, CANADA

so prominent a figure, has joined hands with the exposition managers, and all parties are working harmoniously and vigorously together.

To those who are interested in the development of new things the automobile races will be one of the crowning events of the exposition. All these will start from Vincennes, and whether the run be fifty, one hundred or one thousand miles, the point of departure and the winning post will both be stationed in the grotids, so that visitors, if unable to enjoy the incidents of the entire race, can at least participate in the excitement of the start and finish.

Automobile Races.

Automobile Races.

A series of short-distance automobile races around Lake Daumesnil has been arranged for June, July, August and September. Out of the total sum of \$400,000 appropriated by the exposition for the Vincennes annex, \$25,000 has been set aside for the exhibition and general promotion of the horseless carriage industry, together with the promise of various valuable objects d'art and other prizes for race winners. The closing feature of the automobile display will be a grand procession in Octo-ber, in which all the horseless vehicles ber, in which all the horseless vehicles— carriages, express vans, tourists' cars, motor cycles, etc., will start at the Vin-cennes and move on to the chalet of the Automobile Club of France in the Bols de Boulogne. This procession will cross the main streets and boulevards of Paris, all the vehicles taking part in the parade be-ing gally decorated with flags and flowers. The same evening the automobile launches

ride from Paris by train. The following golf events will be decided: First, amateur championship; second, amateur handicap; third, ladies' championship; fourth, ladies' handicap. The rules of the St. Andrew's handicap. The rules of the St. Andrew's Club will govern the contests, and handsome prizes offered by the director general of the exposition will be carried away by the winners as trophies.

In the Trocadero Gardens, by a curious coincidence of fate, the Transvaal buildings have been erected almost side by side with the pavilions of the British colonies. The day following England's ultimatum to President Kruger some facetious workman pulled down the flag of the South African republic from the Transvaal pavilion and hoisted the "Union Jack" of England in its place. At the time it was considered a good joke, but subsequent developments have caused some conjecture as to whether or not it was a prophecy.

South Africa's Exhibit. The Transvaal for three years past has

position. The South African republic began by voting half a million francs for its display, and the grant passed the raad unanimously. France allotted 25,000 square feet of space after becoming acquainted with the picturesque program which the republic intended to carry outa comprehensive display of the principa products of the Transvaal. One of the features will be exact reproductions of the Boe farms on the Trocadero grounds. So much has been written of the people of the Dutch republic, however, that their exhibit will

Delightfully situated on the right bank of the River Seine and neighboring to Congress Hall and the pavilion of the city of Paris will be the palace of horticulture, one of the handsomest buildings of the entire fair. It consists of two symmetrical conservatories, separated by a prettily arranged garden which covers about 45,000 square feet. The conservatories are twin

SECRETARY LONG.

'The Secretary of the Navy has weighty matters on his hands these days and h found early and late at his desk. With hig ships just built, others building and the demand for an increase in our sea strength that will make the United States the second strongest naval nation in the world, the importance of Secretary Long's po-

Disease of the Stomach.

THIS CONDITION MAY RESULT FROM SEVERAL CAUSES, BUT THE USUAL CAUSE IS CATARRIH, THE MUCUS DROPPING DOWN INTO THE THROAT AND BEING SWALLOWED,

"Is there constant sensation in the stome "Do you feel as if you had lead in stoma "When you get up suddenly are you dizzy "When stomach is empty do you feel fair "Do you belch up material that burns the "When stomach is full do you feel oppo

Disease of the Blood.

FROM THE BLOOD THE TISSUES ARE FED. IF THE BLOOD BE DISPANSED FROM ANY CAUSE THE TISSUES WILL SUFFER, AND AS A RESULT SOME OF THE FOLLOWING SYMITOMS WILL SHOW THEMSELVES:

"Li your color bad?"
"Is your throat sore?"
"Are you all run down?"
"Is the hair falling out?"
"Is the urine high colored?"
"Have you swollen glants?"
Is the skin hot and flushed!
"Does the head feel too full
"Does the skin itch and bur
"Is there persistent headsen."

THIS IS OUR OFFER.
